## AR & Easy

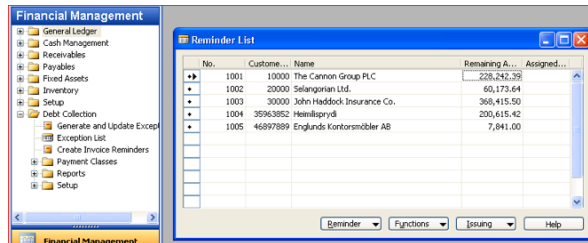

Addon for Microsoft Dynamics NAV / Navision

**All the features of AR & Collections Manager and Easy PDF, plus:**

- ▶ Create lists of newly overdue invoices and send reminders.
- ▶ Add entries to the Exception History table when invoices are mailed.
- ▶ Use the new Trendscape tab to see reductions in days to collect.

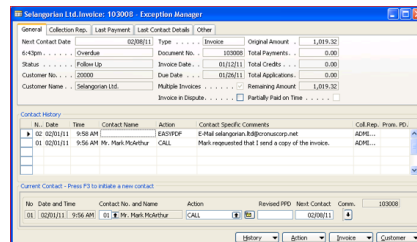

### 1. Easier Invoicing

Create a list of invoices that have newly become overdue in AR & Collections Manager and use Easy PDF to send them a NAV Reminder. This function is designed to try to speed collection without human interaction.

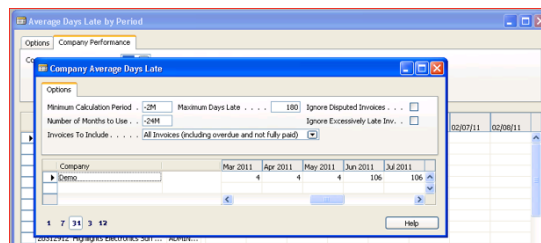

### 2. Keep Track of Exceptions

If an exception has been created for an invoice in AR & Collections, and Easy PDF is used to send a copy of that invoice, an entry is made in Exception History that records this fact and the date it was sent.

### 3. See Trends in Days to Collect

We have added a new tab with a Trendscape that sums all customer information to provide a trended display of the total company average. This display can show if a company's collection efforts to reduce average days to collect are trending successfully, and by how much.

**Contact your local provider to order now.** For more information call, e-mail or visit our website:
